"Stealth taxes"

will push more than 3 million workers into a higher Income Tax bracket by 2029

"Stealth taxes" refer to government policies that increase tax revenue even though they're not labelled as tax hikes. Through freezing Income Tax thresholds, the government may benefit more than you expect.

Income Tax thresholds are frozen until April 2028

Income above your Personal Allowance, which is £12,570 in 2025/26, could be subject to Income Tax.

The rate of Income Tax you pay depends on which band your earnings fall into. The current Income Tax thresholds and rates are:

Band	Taxable income	Tax rate
Personal allowance	Up to £12,570	0%
Basic rate	£12,571 to £50,270	20%
Higher rate	£50,271 to £125,140	40%
Additional rate	over £125,140	45%

NB Income Tax bands, thresholds, and rates are different in Scotland.

Crucially, the Personal Allowance and Income Tax thresholds are frozen until the 2027/28 tax year rather than increasing in line with inflation. This can lead to "fiscal drag", where taxpayers are dragged into a higher tax bracket, even if their income hasn't increased in real terms.

While you might have benefited from a rise in income, for much of the last two years, inflation has been higher than wage growth. So, many workers haven't experienced a boost in their salary in real terms.

Millions of taxpayers are expected to be affected by fiscal drag

According to figures from the Office for Budget Responsibility (OBR), the government's policy of freezing Income Tax thresholds means that by 2028/29:

- Nearly 4 million additional people are expected to pay Income Tax
- 3 million more will start paying the higher rate
- 400,000 workers will be dragged into the additional-rate bracket.

The figures represent a significant increase in the number of taxpayers in each band of Income Tax. The number of higher-rate and additional-rate taxpayers is expected to soar by 68% and 49% respectively.

Of course, this will boost government coffers. The freezes are estimated to raise £42.9 billion by 2027/28.

The cuts to National Insurance (NI) offset some of the fiscal drag, but many taxpayers are likely to find their tax burden is higher overall.

From 6 April 2024, the main employee rate of NI was reduced from 10% to 8%.

There may be ways you could reduce your Income Tax bill

The good news is that there may be steps you could take to reduce your Income Tax bill in a way that supports your finances now as well as your long-term goals.

Depending on your circumstances, you may want to:

- Check if you could use the Marriage Allowance if your spouse or civil partner's income doesn't exceed the Personal Allowance
- Increase your pension contributions to reduce your taxable income
- Save through an ISA to reduce the tax you pay on the interest your savings earn
- Make use of salary sacrifice schemes your employer offers
- Use dividends to supplement your salary.

The above list isn't exhaustive and it's important to weigh up the pros and cons before you proceed.

HM Revenue and Customs practice and the law relating to taxation are complex and subject to individual circumstances and changes which cannot be foreseen.

The value of investments and any income from them can fall as well as rise and you may not get back the original amount invested.
